

Pádel Court Page Specification

Complete structural blueprint featuring the Shark mascot, proprietary assembly system, and custom color options.

Page Goal: Capture club managers, facility operators, and court owners by highlighting heavy-duty resurfacing expertise, proprietary joint durability, extensive color choices, and seamless conversion via the project questionnaire.

1. Main Header & Navigation Bar

Brand / Logo: Apex Turf primary logo positioned on the left.

Navigation Links: Landscaping | **Pádel (Active)** | Football | Golf | Gallery | About Us

Action Element: Right-aligned bold call-to-action button linking directly to the master questionnaire:
[*Get Samples & Quote*]

2. Hero Section (Above the Fold)

Visual Asset: High-impact background featuring the **Shark launching out of a blue pádel court** under stadium lights [cite: 5].

Main Headline: *Apex Performance: Professional Pádel Turf & Court Resurfacing*

Subheadline: *Built for explosive footwork, rapid drainage, and intense tournament play. We don't just lay turf—we engineer courts that outlast the competition.*

Primary CTA: [*Request Court Audit & Samples*]

3. The Pádel Resurfacing Reality

Headline: *Is Your Court Turf Failing Early?*

“Heavy tournament play, intense sliding, and continuous pivoting take a brutal toll on pádel courts. If your current surface is balding, slipping, or tearing at the seams, it's time for an upgrade built specifically for professional sports abuse.”

4. The Apex Advantage: Stronger Courts & Custom Color Ranges

Engineered for Maximum Lifespan & Custom Facility Branding

Proprietary Assembly System & Durability: We specialize in replacing worn-out court turf using our own proprietary assembly system. By reinforcing the seams and joints where traditional installations usually fail, we drastically reduce wear and tear—creating much stronger, longer-lasting courts that stand up to heavy club abuse.

Custom Color Ranges: Tailor your facility's look. Choose from a professional range of high-performance turf colors—including classic blue, striking black, terracotta, green, and custom two-tone court layouts to match your club branding.

5. Technical Specifications for Club Owners

Optimized Sand Infill & Bounce

Engineered for precise, predictable ball bounce and optimal frictional grip for aggressive sliding players.

Rapid Weather Drainage

Advanced porous backing and sub-base design that clears heavy rain fast, getting players back on the court in minutes.

6. Court Project Gallery

Layout: Photos and action shots of completed club courts, highlighting clean line markings, glass surrounds, and custom color options.
